- ⇒ Office client for management
- ⇒ Mobile client for field GPS enabled
- ⇒ Advanced redlining
- ⇒ View electronic drawings
- ⇒ Ability to create follow-up work orders in the field using your GIS assets

MAMS Professional

Promotes
Connectivity

The Challenge

Optimizing the performance of distributed assets while maximizing investment in GIS and taking advantage of the available technologies.

MAMS as a Comprehensive Approach to Asset Management

- **MAMS Professional** is configurable to your needs, and is a cost-effective asset management system that creates a benefit for organizations of all sizes. It maintains full functionality even when disconnected making it highly accessible to your field crews that will be using it on a day-to-day basis.
- **MAMS Professional** makes use of the mobile technology and your investment in *Location-Aware* software to offer a solution that is second to none in terms of functionality, performance, and usability.
- **MAMS Professional** saves time and money while giving you high-speed access to the full Spatial Wave product suite including Mapplet, Field Mapplet, and Map Library, with all three working together to increase the organization and accessibility of your public works assets.
- **MAMS Professional** is a stepping stone to a more robust MAMS Enterprise which addresses vertical assets and a complete financial component. MAMS Professional can make moving towards an Enterprise system easier, and help streamline mobile workflows across the board.
